EXAMINER

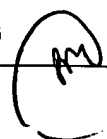

CHEN, JACK S J

ART UNIT PAPER NUMBER

2813

DATE MAILED: 12/13/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/707,111	Applicant(s) SUNG, CHIH-FENG	
	Examiner Jack Chen	Art Unit 2813	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 6-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's admitted prior art.

Applicant's admitted prior art discloses an active matrix organic light emitting diode (AMOLED) display, comprising: a substrate 100, wherein the substrate comprises an emitting region 120 and a non-emitting region 122, and a plurality of pixel structures 107 is deposited on the substrate in the emitting region; a power line 110, wherein the power line is deposited on the substrate in the non-emitting region 122, and is electrically connected with the pixel structures 107; and a cap 114, deposited above the substrate and bonded with the substrate 100, wherein the cap covers the emitting region 120 of the substrate and the power line 110 in the non-emitting region (*NOTE: at least a portion of the power line is covered by the cap 114 in the non-emitting region 122, see fig. 1*), see figs. 1 and paragraph 5-10 for more details.

Re claim 9, wherein each of the pixel structures is composed of an active matrix device, an anode layer 102, an emitting layer 104, and a cathode layer 106 (fig. 1).

3. Claims 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Lih et al., U.S./6,806,638.

Lih et al discloses an active matrix organic light emitting diode (AMOLED) display, comprising: a substrate 100 (figs. 3-4), wherein the substrate comprises an emitting region 120 and a non-emitting region 122 (fig. 3), and a plurality of pixel structures 107 (fig. 3) is deposited on the substrate in the emitting region; a power line 108 (fig. 4), wherein the power line is deposited on the substrate in the non-emitting region (figs. 3-4), and is electrically connected with the pixel structures (figs. 3-4); and a cap 200, deposited above the substrate and bonded with the substrate (fig. 4), wherein the cap covers the emitting region of the substrate and the power line (fig. 4) in the non-emitting region (figs. 3-4), see figs. 1-4 and cols. 1-6 for more details.

Re claim 7, wherein the cap 200 covers most of the power line 108, and only a small section of the end of the power line is exposed (fig. 4).

Re claim 8, wherein the cap 200 is a metal cap or a glass cap (col. 4, lines 4-11).

Re claim 9, wherein each of the pixel structures is composed of an active matrix device, an anode layer 102, an emitting layer 104, and a cathode layer 106.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lih et al., U.S./6,806,638.

Lih et al. disclosed above, and in particular col. 3, lines 45-48 shows using conductive material for the power line (fan-out conductive line). Although the exact recitations "metal material" of instant claim 10 is not explicitly stated by Lih et al., but this is Prima Facie obvious over Lih et al. since metal material is part of the conductive material. And the selection of a known material based on its suitability for its intended use supported a prima facie obviousness determination in *Sinclair & Carroll Co., Inc. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945). "Reading a list and selecting a known compound to meet known requirements is no more ingenious than selecting the last piece to put in the last opening in a jig - saw puzzle." 65 USPQ at 301.).

Therefore, the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to select any suitable material (i.e., metal) for the conductive line.

Response to Arguments

6. Applicant's arguments filed 10/17/2005 have been fully considered but they are not persuasive.

Applicant argues that the Applicant's admitted prior art fails to show the cap covers the power line in the non-emitting region. Examiner respectfully disagrees because fig. 1 clearly shows such feature (*NOTE: at least a portion of the power line is covered by the cap 114 in the non-emitting region 122, see fig. 1*).

Applicant argues that the prior art (Lih et al) fails to show 1) a power line is deposited on the substrate in the non-emitting region, 2) and is electrically connected with the pixel structures, 3) and a cap covers the emitting region of the substrate and the power line in the non-emitting region. With respect to 1), as noted in above, the conductive line 108 (or 108 taken with 110) is considered as the power line (note: the specification does not provide any special definition for the phrase "power line". Therefore, any conductive line/wire that is capable of conducting current is considered as "power line"), which is deposited in the non-emitting region 122 (i.e., portion not in the emitting region 120); with respect to 2), Lih et al. clearly shows the power line is electrically connected with the pixel structure (i.e., see col. 3, lines 50-53 and col. 4, lines 24-31); with respect to 3), Lih et al. clearly shows that the cap 200 covers the emitting region 120 of the substrate and the power line 108 (or 108 taken with 110) in the non-emitting region 122, see figs. 3-4.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (571)272-1689. The examiner can normally be reached on Monday-Friday (9:00am-6:30pm) alternate Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl W. Whitehead can be reached on (571)272-1702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
